

## AUDIO INPUT

Connecting audio to this HiFi Case is easy. Choose your laptop, iPod, tablet, iphone, cd player, walkmen etc... press play and turn your volume up. Then proceed to connect as follows:

### ANALOG INPUT

Plug in to the headphone jack on your device using the supplied 3.5mm stereo jack and plug the other end into the HiFi Case audio input.

**pro tip:** there is a 1/4 inch jack with an adapter allowing you flexibility to connect other devices to this HiFi Case.

### BLUETOOTH INPUT (SURE HIFI)

Push the power switch to the ON position (a blue light will appear) then go to the bluetooth settings on your phone or laptop. Choose HIFI CASE from the list of available bluetooth devices.

## BATTERY

The internal rechargeable battery will run up to 15 hours on a good charge.

### POWER INPUT

To charge your HiFi Case, plug in the supplied power cable to the power input. The battery indicator will be red during charging mode and turn green once the battery is fully charged. To maintain battery life we recommend unplugging the charger once the battery is fully charged,

### PHONE CHARGING USB OUTPUT

To charge your phone, plug in your USB cable to the port on the top left of the case. Please note this port is only on when the main power switch is on.

## AMP CONTROLS

The power switch for the entire HiFi case is located on the top right of the case. Push the switch to the ON position (a red light will appear). Please note this switch will turn on/off the entire device including the bluetooth. The bluetooth has its own switch that functions only if this main switch (red light) is on.

This HiFi Case uses a simple single knob control to turn power on and adjust volume. Turn the knob clockwise to turn the HiFi Case on and increase the volume. 0 volume is to the left and 10 is to the right.

**pro tip:** consider turning the HiFi Case off after every use to conserve battery life.

## CABLES INCLUDED

This HiFi Case comes with the following audio and power cables:

## QUICK START

Lets play!

### PLUG IN

Locate the power cable for the HiFi Case and plug one end into a wall outlet and the other into the side of the HiFi Case.

### CONNECT

Plug in to the headphone jack on your ipod/iphone/mp3 player or computer using the supplied 3.3mm stereo jack and plug the other end into the HiFi Case analog audio input using the input jack adaptor.

### PLAY

Make sure the volume is up on your music device and check to see that music is playing on your screen. Then locate the black knob on the HiFi Case. Slowly turn it clockwise until you hear music.

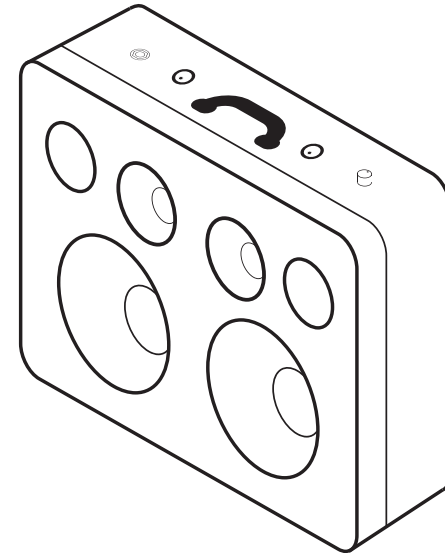

### GOING FURTHER

The flipside of this manual has more instructions regarding bluetooth and maintaining the health of the battery inside.

ENJOY!
